

JANANI JAYAKUMAR

Frontend Engineer | React.js | Javascript | Next.js (SSR, SSG - working Knowledge)

Salem, Tamil Nadu, India • +91 9080555211 • jananijayakumar367@gmail.com • linkedin.com/in/jananijayakumar121299

PROFESSIONAL SUMMARY

Frontend Engineer with 4+ years of experience building scalable, high-performance enterprise web applications using **React.js, TypeScript, JavaScript (ES6+), Redux Toolkit and modern frontend architectures**. Strong hands-on expertise in reusable component design, performance optimization, and state management using redux. Proven ability to improve application performance, ensure code quality through testing (JEST), and deliver production-ready solutions in Agile environments. Experience working with large-scale applications serving thousands of users.

TECHNICAL SKILLS

Frameworks & Libraries: React.js, Next.js (SSR, SSG – working knowledge), React Hooks, Context API, Redux Toolkit, Redux-Saga, Context-API

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS/SASS

Rendering Strategies: SSR, SSG, Incremental Static Regeneration (ISR), Client-Side Rendering (CSR)

Styling: Tailwind CSS, Bootstrap, Material UI, Responsive Web Design

API Integration: REST APIs, Axios, Fetch API, GraphQL (basic understanding)

Performance : Code Splitting, Memoization, Lazy Loading, API Caching, Lighthouse, Chrome DevTools

Testing: Jest, React Testing Library, Unit & Integration Testing

Tools & DevOps: Git, GitHub, Webpack, Babel, Figma, Jira, AWS (basics), Docker (basics), CI/CD (basics)

Core Concepts: Scalable UI systems, Agile/Scrum, WCAG Accessibility, Frontend Architecture

PROFESSIONAL EXPERIENCE

Associate – Frontend Engineer | Cognizant Technology Solutions (Client: PepsiCo) | Jan 2025 – Present

- Designed and contributed to frontend architecture for enterprise-scale React.js + TypeScript applications serving 10,000+ users.
- Built reusable and modular UI components, improving development efficiency and reducing code duplication by 20%.
- Optimized application performance by 25% using code splitting, memoization, and API caching strategies.
- Used Chrome DevTools and Lighthouse to identify and resolve performance bottlenecks.
- Managed client-side state using Redux Toolkit and integrated multiple REST APIs.
- Ensured high code quality by writing unit and integration tests using Jest and React Testing Library (90%+ coverage).
- Conducted code reviews and followed best practices to maintain scalable and maintainable codebases.
- Collaborated with cross-functional teams (Product, UX, Backend) in Agile/Scrum environments.

Programmer Analyst – Frontend Developer | Cognizant Technology Solutions | Feb 2023 – Dec 2024

- Developed scalable React applications using Redux for state management and modular architecture.
- Improved application performance using lazy loading, bundle optimization, and efficient state handling.
- Implemented automated testing and improved code quality through structured review processes.

Programmer Analyst Trainee | Cognizant Technology Solutions | Feb 2022 – Feb 2023

- Completed full-stack MERN training (React, Node.js, Express, MongoDB) and built a production-style full-stack job portal application following SDLC and Agile best practices.
- Strengthened core fundamentals in data structures, algorithms, and frontend system design through structured coursework and applied projects.

KEY PROJECTS

PepsiCo Enterprise Internal Portal — *React.js, TypeScript, Redux Toolkit, REST APIs, Jest*

- Led frontend architecture for a global portal serving 10,000+ users; implemented performance optimizations yielding a 25% load time improvement and 90%+ test coverage.

Reusable UI Component Library — *React.js, Redux-Saga, SCSS, Storybook*

- Built a modular, scalable component library used across multiple teams, improving development speed and consistency, while reducing code duplication by 20%.

Full-Stack Job Portal — *React.js, Node.js, Express.js, MongoDB*

- Designed and built a full-stack job portal during training, applying REST API integration, CRUD operations, and responsive design principles.

Next.js Portfolio Application — *React.js, Next.js, Typescript, vercel*

- Built a portfolio application using Next.js, implementing SSR and SSG for improved performance and SEO.
- Developed dynamic routing and reusable components following modern frontend best practices.
- Deployed the application on Vercel with optimized performance and fast page load times.

EDUCATION

B.E. Electronics & Communication Engineering

Government College of Engineering, Salem | Jun 2017 – Apr 2021 | CGPA: 9.0/10

CERTIFICATIONS

- React Advanced Concepts – Udemy (2024)
- Frontend Security Best Practices – Udemy
- AWS Cloud Practitioner – In Progress
- Next.js Official Documentation & Vercel Learning Path – In Progress(Udemy)
